

Heavy Duty Industrial Sliding Door Operator 1071.121 is designed for industrial & commercial heavy duty sliding doors for more than 400kgs/leaf. Ideal for radiology, solid core, lead type, steel framed, extremely thick glazed door applications.

Art. 1071.121

Feature:

- *Powerful 120W brush-less DC motor, suitable for heavy duty sliding door weighing 2*400kgs.
- * Low noise of motor, under 52dB.
- *Special track and wheels, carrying heavier and more stable.
- *Large radius wear-resistant pulley, low noise, longer service life.
- *Photobeam can be connected with high safety.
- *Full open and partial open can be selected, manual open in case of power failure
- *Good for factories, hospitals, airports, and other high security areas.

Technical parameter:

Specifications	1071.121	
Door type	Single	Bi-part
Door weight (max)(kg)	1x500	2x400
Clear passage width(mm)	500~6000	500~6000
Opening speed (adjustable) (mm/s)	600	550
Closing speed (adjustable) (mm/s)	600	550
Hold-opening time (adjustable)(s)	1~20	
Input voltage (V)	100-240	
Motor (VDC)	24V Brushless motor	
Power voltage (VAC, Hz)	AC100V-240V, 50/60Hz	
Motor power (W)	120	
Consumption power (W)	120	
Working temperature (°C)	-20~+50
